

# CURASEPT<sup>®</sup> AFTERAPID<sup>+</sup>

# RAPID RELIEF, RAPID HEALING

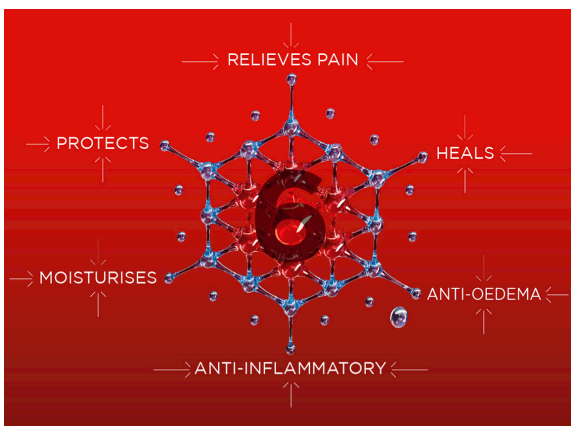

## FOR THE TREATMENT OF MOUTH **ULCERS**, SOFT TISSUE **LESIONS** AND **SORES**

Unbearably painful and making it incredibly difficult to eat, talk and swallow; mouth ulcers are one of the most common oral cavity conditions that patients suffer from.

This is closely followed by soft tissue lesions caused by wearing **fixed orthodontic appliances**, and mouth sores caused by various forms of **cancer treatment** (such as chemotherapy and radiotherapy), or factors including **food allergies**, **auto-immune syndromes**, **hormonal problems**, **infectious diseases** and **genetic predispositions**.

Designed to rapidly reduce pain as well as accelerate healing with its innovative formula; Curasept Afterapid<sup>®</sup> contains muco-adhesive polymers enriched with six active ingredients (including Hyaluronic Acid, Tea Tree and Manuka Oil, and plant-derived DNA) for targeted benefits.

### Curasept Afterapid<sup>®</sup> **PROTECTIVE GEL** - 10ml tube

(CUR04100) Ideal for localised action in cases of single or small mouth ulcers.

### Curasept Afterapid<sup>®</sup> **MOUTHWASH** - 125ml bottle

(CUR04101) Ideal for widespread action for multiple lesions and recurrent mouth ulcers. This can be used in combination with the gel to enhance the healing process.

### Curasept Afterapid<sup>®</sup> **SPRAY** - 15ml bottle

(CUR04102) Perfect for targeted action in hard to reach areas. This can be used in combination with the gel to enhance the healing process.

# CURASEPT® AFTERAPID<sup>+</sup>

## DNA/RNA

Boosts tissue regeneration at a bio-cellular level and reduces inflammation

## BIOMOIST® HYALURONIC ACID

Forms a protective and moisturising lipidic-film to protect against irritations, reduce pain and accelerate healing

## TEA TREE OIL AND MANUKA OIL

Anti-bacterial and anti-fungal properties

## 18β GLYCYRRHETINIC ACID

Reduces swelling and inflammation

## RUSCOGENIN

Astringent properties to reduce bleeding

## ALLANTOIN

Drives cell proliferation to accelerate healing whilst also providing a hydrating and soothing effect to relieve irritations

## HOW DOES THE FORMULA WORK?

The synergy of ingredients within Curasept Afterapid® is at the heart of the formula's innovation.

The formula directly addresses lesions in the layers most affected by the degenerative process, stimulating cell proliferation and wound repair and ultimately leading to a reduction in healing time.

The active ingredients (such as **Tea Tree and Manuka Oil, 18β Glycyrrhetic Acid, Allantoin** and **Ruscogenin**) provide protective, anti-inflammatory, anti-oedematous and reparative elements. **Biomist®**, an unhydrolysed and unsalified Hyaluronic Acid characterised by three distinct molecular weights, plays a pivotal role in mitigating inflammation and fostering the repair and safeguarding of gingival and mucosal cells. Furthermore, the formula incorporates **plant-derived DNA/RNA** fractions, renowned for their anti-inflammatory properties, capable of activating biological mechanisms conducive to tissue repair.

By leveraging the action of polynucleotides, Curasept Afterapid® preserves cell viability and facilitates the proliferation of blood vessels and other tissue. Concurrently, the presence of hyaluronic acid fosters an optimal microenvironment for the neoformation of connective tissue and epithelium, offering protection against potential infections. This concerted approach accelerates healing processes, leading to a noticeable reduction in pain - from the first use.
